

“WIND” by Green Filter

- The little Universal airbox -

Green Filter have developed a new concept of universal airbox which will be showed for the first time at Paris Tuning Show on 23th of February.

What is Wind airbox?

a Dynamic Airbox using a Green cotton air filter.

This airbox is coming from the Storm Family, shorter, it is adapted to little engines up to 100 HP.

Material is ABS Noryl, resistant to 120°C.

Three differents Ø:
65 - 70 - 75 mm.

Fixing bracket integrated to the airbox.

Dimensions :

- Outside Ø: 80 mm
- Total height : 160 mm
- Maximum Ø: 120 mm

In order to answer on many customers enquiries, Wind will be available end of February in 8 colours:

- Anodised Blue - Anodised Red - Anodised Green - Black - Silver - Titanium - Carbon look - Chrome.

Wind is giving you the possibility to offer to your differents customers a range of new products keeping the quality of Green air filters for a very attractive price, which can compete with South Asia Cheap products.

Green is a real brand image recognized in the World of Racing: most of World Rallye Teams in WRC are using Green filters as Peugeot, Subaru, Mitsubishi, Ford, Skoda etc..., but also in Endurance Races as “24H du Mans” with Pescarolo....

Green is also involved in Motorcycle Racing with Yamaha and GMT 94 Team, winner of the last “24H du Mans moto”, 2nd of “Bol d’or”...

When you are buying a Green air filter, you are using same material as Racing Top Teams are using too. Your engine is breathing pure air with exactly the same filter that make World Champion Winners.
